MicrosolutionsConsulting.com. A Modern Approach to Web Hosting

The web hosting Control Panel is the part of the web hosting platform that the clients actually see. And 90% of the hosting providers out there use the same hosting Control Panel - cPanel. We, though, look upon cPanel as being archaic and hard to work with - it simply obstructs our work. This is the reason why we took the decision to employ another web hosting Control Panel - the Hepsia hosting Control Panel. It's new, has a fresh look & feel and offers billing, domain and website administration possibilities, so you can manage all aspects of your online presence from one place. Plus, it has a drag & drop File Manager, so you won't need to use a third-party FTP client. Our tests have verified that the Hepsia web hosting Control Panel works three times as fast as other hosting Control Panels! We have also created a web hosting Control Panel demo - you can check for yourself how Hepsia functions.

MicrosolutionsConsulting.com A Stable Web Hosting Service

Your web site needs to be accessible online. That is why we count on first-class hosting servers driven by the proven blend of Linux and Apache. We are also partnering with 4 excellent datacenter facilities where you can host your site. This permits us to offer a 99.9% network uptime guarantee.

A People-Oriented Approach

Last, but surely not least - we are there for you! We have Live Chat technicians who are there to reply to all your pre-sale enquiries and to help you resolve small technical problems. We have a first-rate 24/7/365 client care service. We offer a 1-hour trouble ticket response time guarantee, but in the majority of instances our client support team representatives respond to support tickets in no more than 20 minutes!
